

French silver marcasite and pearl ring

Sold

REF: 6515

Description

A 1930s French silver deco marcasite and pearl ring

UK Ring Size: L

Marcasite, a mineral composed of iron sulphide, is prized for its metallic lustre and vintage appeal in jewellery. Often mistaken for pyrite, it boasts a subtle, pale gold or silver-grey shimmer. Popular in Victorian and Art Deco designs, marcasite adds a touch of antique elegance to rings, pendants, and brooches. Its intricate settings and reflective surfaces create a timeless charm. Durable yet lightweight, marcasite remains a favoured choice for those seeking classic, understated sophistication.
