

GPO Bakelite 332F telephone

Sold

Description

A refurbished GPO Bakelite 332F rotary dial telephone in full working order, circa 1940.

The original design of this telephone had a tray for the subscriber's personal directory but as from June 1940 the tray was not fitted and instead the telephone was supplied with a blank plate. This was probably a war time cost saving, because in late 1947 the tray was re-introduced.

This telephone has been updated to work on current landline connections.
