

18ct yellow gold opal and diamond ring

£345

REF: 6563

Description

An 18ct yellow gold Edwardian ring set with three black jelly opals and rose cut diamonds, hallmarked Birmingham 1917

UK Ring Size: M

Black jelly opals are mesmerising gemstones known for their deep, translucent dark body tone and vibrant play-of-colour. Found primarily in Australia, these opals captivate with their ethereal glow, displaying flashes of red, green, blue, and yellow hues that seem to float within the stone. Their unique jelly-like appearance makes them highly sought after by collectors and jewellery designers.
